Our Lady of Lourdes School of Nursing and Camden County College Conduct a Cooperative Program which grants the students a Diploma in Nursing from the School of Nursing and an Associate in Science Degree from Camden County College.

NURSING: OUR LADY OF LOURDES: Effective September, 2021

NOL-110 Health Assessment (2.00 cr.)

This course will allow students to develop a strong foundation in health assessment skills needed to care for diverse individuals across the lifespan. Emphasis is placed on obtaining a health history, performing a comprehensive assessment and identifying health risks. The concepts related to health care recipient, health and illness, and professional nursing will be correlated to the corresponding assessments of these concepts. The course supports achievement of the program outcomes related to patient-centered care, clinical judgment, safety and informatics. Laboratory experiences will provide the student the opportunity to demonstrate assessment skills, identify alterations in health, communicate findings, and develop an appropriate teaching plan to promote health.

Lecture (15.00), Laboratory (30.00)

Prerequisites: CHM-101, ENG-102, HIS-101, MTH-111, PSY-101 and BIO-118, and BIO-121

Co-requisites: NOL-102

NOL-102 Foundations of Practice and Mental Health Nursing (8.00 cr.)

This course introduces the student to the foundations of nursing practice and the role of the nurse when caring for adults with medical and mental health disorders. A conceptual approach to learning is utilized to examine the characteristics of individuals seeking care, factors affecting health and illness, and the roles of a professional nurse. Program concepts of patient-centered care, clinical judgement, safety, teamwork and collaboration, professionalism, leadership, evidence-based practice and health informatics are introduced. The student will have the opportunity to apply these concepts when caring for adult patients in medical-surgical and mental health units and in a simulated laboratory setting.

Lecture (60.00), Clinical (184.00)

Prerequisites: CHM-101, ENG-102, HIS-101, MTH-111, PSY-101, and BIO-118, and BIO-121

Co-requisites: NOL-110

NOL-111 Health Promotion and Illness Management of the Childbearing Family & Adult with Chronic Illness (8.00 cr.)

The course focuses on the care of the childbearing family and the adult with chronic illness. The student's knowledge of professional nursing practice is progressed through the application of the program concepts of clinical judgment, patient-centered care, teamwork and collaboration, evidence-based practice, safety, informatics, leadership, and professionalism. The concepts related to individuals seeking care, health and illness, and the roles of a professional nurse are utilized to achieve a deeper understanding of the health promotion and illness management of these clients. The student will have the opportunity to apply these concepts when caring for clients in medical-surgical and maternal/infant clinical areas and in a simulated laboratory setting.

Lecture (60.00), Clinical (184.00)

Prerequisites: NOL-110, NOL-102 and PSY-109

NOL-202 Nursing 3: Management of Acute and Chronic Health Issues across the Lifespan (8.00 cr.)

The course focuses on the nursing care of children and adults with acute and chronic illness. The student's knowledge of professional nursing practice is progressed through the application of the program concepts of clinical judgment, patient-centered care, teamwork and collaboration, evidence-based practice, safety, informatics, leadership, and professionalism. The concepts related to individuals seeking care, health and illness, and the roles of a professional nurse are utilized to achieve a deeper understanding of the health promotion and illness management of these patients. The student will have the opportunity to apply these concepts when caring for patients in medical-surgical, perioperative, and pediatric clinical areas and in a simulated laboratory setting.

Lecture (60.00), Clinical (184.00)

Prerequisites: NOL-111, SOC-101

Co-requisites: None

NOL-211 Nursing 4: Management of Individuals and Groups with Complex Health Issues (8.00 cr.)

The course focuses on the nursing care of individuals and groups of patients with complex health issues. The student's knowledge of professional nursing practice is progressed through the application of the program concepts of clinical judgment, patient-centered care, teamwork and collaboration, evidence-based practice, safety, informatics, leadership, and professionalism. The concepts related to individuals seeking care, health and illness, and the roles of a professional nurse are utilized to achieve a deeper understanding of the illness management of these patients. The student will have the opportunity to apply these concepts when caring for groups of patients in medical-surgical areas, critical care and emergency department and in a simulated laboratory setting. The clinical experience culminates in a final capstone experience where the student experiences the full scope of professional nursing

Lecture (60.00), Clinical (184.00)

Prerequisites: NOL-202, PHL-232
Co-requisites: NOL-235

NOL-235 Transition to Practice (3.00 cr.)

This course will allow students to discuss the role of professional nursing in a dynamic health care environment. Students will examine professional, practice, legislative, ethical, and legal issues affecting nursing practice. The course will provide the knowledge and skills to allow students to effectively transition into the role of the Registered Professional nurse. Concepts related to professional nursing practice and health care are emphasized.

Lecture (45.00)

Prerequisites: NOL-202, PHL-232
Co-requisites: NOL-211
